

TUSHAR SANJIV SONAWANE

Senior Scrum Master | Agile Delivery & Technical Program Management

Nashik - Pune, India (Open to Mumbai) | +91-7620942068 | tushar-sonawane@outlook.com | LinkedIn: tusharsonawanes | 15 Days Notice

PROFESSIONAL SUMMARY

Senior Scrum Master with 7.3 years in Agile delivery, Data/Analytics and Cloud Platforms - including 4 years leading enterprise-scale Scrum delivery for data, analytics, and AI teams. Proven record improving delivery predictability and Agile maturity across globally distributed teams. Experienced partnering with senior stakeholders and Product Owners in regulated enterprise environments and applying Generative AI to accelerate backlog refinement, documentation, and reporting.

CORE COMPETENCIES

Agile Leadership: Scrum Mastery & Agile Coaching, Agile Transformation, SAFe, Servant Leadership, Continuous Improvement, Psychological Safety

Delivery & Program Management: Cross-team Dependency Management, Capacity & Release Planning, Flow Metrics & Delivery Predictability, Risk & Impediment Management (RAID), Stakeholder & Governance Reporting, Value Stream Management

Tools & Technical Skills: Jira, Confluence, Azure DevOps (ADO), Advanced JQL, Generative AI / Prompt Engineering, SQL, GenAI-Assisted Tool Building, Custom Dashboarding, Sprint & Flow Reporting, Miro, Jira Plans, Jira Structure, and Jira Automation

PROFESSIONAL EXPERIENCE

Senior Scrum Master

T-Systems ICT India Pvt. Ltd. | Pune, India

Sept 2022 – Present

- **Lead Agile Delivery** for 4 globally distributed cross-functional teams (35+ members) powering data engineering, analytics, and Machine Learning for Deutsche Telekom's **Mein Magenta App** and **MagentaTV**, within the Digital Touchpoint Analytics value stream.
- **Implemented sprint-level delivery and velocity tracking** across 4 teams, sharpening estimation accuracy and giving leadership consistent, real-time visibility into value-stream throughput through custom dashboards.
- **Own RAID-based risk and blocker management** across the value stream - resolving in-team blockers directly and escalating issues beyond team-level resolution to value-stream and domain leadership via RAID boards.
- **Directly responsible for hiring** and team scaling, coordinating with leadership and HR to fill open roles against sprint capacity needs across 4 teams.
- **Independently designed and built** a data lineage tracking tool - a GenAI-assisted HTML explorer pulling directly from Excel-based source data, with value-stream-level filtering - giving teams source-to-dashboard traceability without manual tracing through pipelines and documentation. Adopted by domain leadership, currently scaling to tribe-wide use.
- Managed FTE allocation and resource planning in compliance with German labor regulations and works council (Betriebsrat) requirements, balancing team capacity needs against legal and organizational constraints.
- Coached Product Owners and stakeholders on backlog refinement and value-based prioritization, improving sprint-ready backlog, resulting in predictable quarterly planning for the valuestream.
- Designed value-stream-level delivery dashboards and flow metrics, giving leadership real-time visibility into 4 teams' progress while preserving team autonomy.
- Balanced Agile delivery with governance and compliance requirements in a regulated enterprise environment, supporting audit and reporting needs without slowing team velocity.
- Served as Scrum Master and Product Owner (dual role) for Smartvoice (Voice Analytics) and CSI (Customer Satisfaction Index), owning discovery-to-delivery alignment end to end.
- Partnered with German business stakeholders during onsite engagements to align delivery priorities, product roadmaps, and strategic business objectives across a 4-team portfolio.
- Spearheaded advanced Jira tooling - Jira Plans, Structure, and custom automations - building complex Confluence reporting and analytics on Jira data to give leadership real-time delivery visibility.

Business Analyst

Astegic Infosoft | Jaipur, India

April 2022 – August 2022

- **Improved sprint delivery predictability by 12%** through effective backlog ownership, prioritization, and refinement.
- Conducted as-is / to-be analysis to align evolving business needs with technical delivery.
- Collaborated with Scrum Masters and delivery teams in sprint planning, estimation, and retrospectives.

Technical Business Analyst

ESDS Software Solution Limited | Nashik, India

April 2019 – April 2022

- **Led end-to-end requirement analysis and delivery** for multiple enterprise and SaaS products, including a WebRTC-based video conferencing platform supporting 1,000+ concurrent participants.
- Acted as the bridge between business, engineering, and operations teams to enable predictable delivery and stakeholder alignment.
- Supported Agile teams through backlog creation, refinement, sprint planning, and release coordination.
- **Introduced Kanban boards to research-based teams**, driving an early Agile transformation for teams previously operating without formal delivery process.
- Contributed directly to on-prem cloud research initiatives as a research/DevOps contributor, working hands-on with Ansible, Docker, Kubernetes, and Jenkins, and co-authoring research papers on the outcomes.

CERTIFICATIONS

- SAFe Certified Product Owner / Product Manager (6.0.1)
- Microsoft Certified: Azure Fundamentals
- PMI Certified Professional in Managing AI (PMI-CPMAI) — Pursuing
- Google Cloud Digital Leader / Associate Cloud Engineer — Pursuing
